The MOST HIGH shall fight for you, and ye shall hold your peace (piece). Exodus 14:14

THINK ABOUT IT!

Gen. 10:25- the name "Peleg" means to "divide." It is said that in the past, all land mass was united, if this is true where would this place North America in terms of Africa?

BANEEM CORNER

Our Children should be taught how to say "thank you, your welcome, and the blessing for food today in the Hebrew tongue.

HISTORY

"Geologists today have generally concluded that the continents were once connected in one giant super continent they have named "Pangaea". Computer imaging has shown how all the continents appear to fit together. As an example the eastern shores of North and South America conform to the western shore lines of Europe and Africa. Geologist call have named this the "Continental Drift Theory". The conclude that from the contour of the continents fitting so perfectly together, the rifts on the ocean floor and the present measurable movements of the continents that in the past, at some time the continent were one large land mass.

All of these evidences lead to the conclusion that if the continents did divide this dividing could have occurred in relation to the division of the languages after the Tower of Babel. Possibly, some time after the migrations caused by the confusion of languages, when the people when sufficiently dispersed, God caused the continents of move apart. This would account for man, and animals being on the isolated continents of North and South America and Australia. There were people on the continents when they moved. It appears that God not only divided the people by confusing their languages, He also divided in the land so the dispersion would continue. The division of the land precluded that the people on earth could have physically come back together had they been able to overcome the language barriers." <http://www.bible-truth.org/GEN10.HTM>
